The Netherlands, Norway and Germany share a long tradition of cooperation in the maritime sector at different levels. In this context, exchange has been sought several times, for example various INTERREG projects and excursions have been organized.

This year, a two-day event took place - online due to corona reasons in which synergy and cooperation potentials especially concerning green shipping activities have been explored. Based on previous outcomes, an excursion to Bergen and Florø in Norway will be organized in June 2022.

During this excursion the topics „hydrogen“ and „electrification“ will be highlighted. The event is organised in close cooperation with the [German-Norwegian Chamber of Commerce](#), which have an extensive experience in the planning of sector-specific, needs-oriented program concepts for delegations from business and politics and a broad network in the fields of maritime economy and hydrogen.

This event is particularly aimed at representatives for small and medium-sized enterprises who want to learn more about these innovation topics, and exchange ideas on cooperation opportunities between Germany, the Netherlands and Norway.

We are looking forward to an interesting event with you!

REGISTRATION

The **number of participants is limited**. Registrations will be considered in order of reception. Please note that we will charge an **organisation fee of 300 EUR (excl. VAT)** per participant. Travel and departure costs, accommodation and catering are paid by the participants (approx. 1.000 EUR).

The excursion is organised by [MARIKO GmbH](#) and [FME](#) as part of the project [H2Watt](#).

In cooperation with:

GREEN SHIPPING
Waddenzee
